Heart Like a Clock

The pulsation of the heart marks the passage of the blood through the veins, just as the ticking of a clock indicates the flight of moments of time. Palpitation, fluttering or irregular action reveals the fact that the heart is running downand unless strengthened, is liable to stop at any time under some weakening influence, such as excitement, over-work, or intense mental or physical strain. To regulate the heart action, you should take Dr. Miles' Heart Cure when any symptoms of a weak heart is apparent. It has no equal. "Sometime ago I had a very severe pain around my heart, and most of the time I had a heavy beating or throbbing of the heart. It would beat so that when I lay down at night it would sound like a small clock in bed with me. I could count the ticking. With every little exercise, or walking I felt like my heart would give out, and I would be so tired I would have to lie down and rest. I suffered quite a while in this way, then I concluded to try Dr. Miles' Heart Cure. I had not taken it long until I began to feel easier, and so centinued, and the medicine enturely cured me. I am very grateful for the great good I received from Dr. Miles' Heart Cure."

St. Petersburg, March 2.—The reactionary policy of Interior Minister Durnovo received another decided setback Wednesday, when the action of the St. Petersburg police in closing the central bureau of the Constitutional Democrats was disowned by the Government and the bureau was allowed to be reopened, and the police were ordered to abstain from further interfering with the cam-paign work of the party. This flagrant attempt to interfere with the elections, which is condemned even by the Con-servative parties, is generally ascribed to M. Durnovo, without whose authority the police would hardly have dared to take such action in the capital. The event revivines the rumor of M. Durnove's approaching retirement, which a trusted subordinate of Premier Witte yesterday said was certain to occur so soon as the national assembly meets and which might be expected sooner.

"My son, who is now twenty-two years of age, when he was four months old began to have eczema on his face, spreading quite rapidly until he was nearly covered. The eczema was something terrible, and the doctors said it was the worst case they came to the doctors. case they ever saw. At times his whole body and face were covered, all but his feet.
